4. False negative results may be attributable to improper sample collections, improper transport, treatment, PCR inhibitors, etc.
5. The results of this test pertain to the sample received.
6. As per ICMR guidelines, the contact and test details of all patients undergoing COVID-19 testing need to be uploaded on the ICMR reporting portal and the same will be accessed by stakeholders including IDSP, MoHFW for timely initiation of contact tracing and appropriate control measures.
